Soviet Education

Nigel Grant

published by Penguin Books

Revised Edition

Interest in Soviet education has intensified recently, due to an increasing public awareness of educational problems in general. There has, however, so far been a lack of a short, up-to-date, comprehensive account of the Russian educational system.

In this study Nigel Grant not only describes the different types of schools and colleges in the U.S.S.R., and the work they do, but also examines the educational system as a whole against its geographical, historical, social, and political background. As well as giving a very vivid impression of life in Soviet schools, he provides much fascinating material for comparison with our own educational theories and problems.

The author is a lecturer on education at the University of Edinburgh.
